

howto, wayland, x11, logindt

## How to find out if I am using wayland or X11?

- <https://unix.stackexchange.com/questions/202891/how-to-know-whether-wayland-or-x11-is-being-used>

Find out the session ID

```
logindt
```

```
SESSION  UID USER          SEAT   TTY
        4 1000 <YOURUSERNAME>  seat0
```

```
1 sessions listed.
```

Session ID seems to be "4" in my case.

Display the type of session

```
logindt show-session <SESSION_ID> -p Type
```

```
Type=x11
```

Handy oneliner:

```
logindt show-session $(logindt | awk '/'"$USER"'/{print $1}') -p Type
```
