monitoring a host

this is checking:

- ping via IPv4 and IPv6
- http connection to various FQDNs
- expiration of SSL certificates

```
check host host.domain.tld with address host.domain.tld
  if failed ping4 then alert
  if failed ping6 then alert
  # ISPConfig
  if failed
    port 8080
    protocol https
    and certificate valid > 3 days
  then alert
  # generic domain
  if failed url https://host.domain.tld/
    with timeout 15 seconds
    and certificate valid > 3 days
  then alert
  # Roundcube
  if failed
    port 443
    protocol https
    request /webmail/
    with timeout 15 seconds
    and certificate valid > 3 days
    content = "The Roundcube Dev Team"
  then alert
group connectivity
```
