

[monit](#), [monitoring](#), [host](#)

monitoring a host

```
check HOST host.domain.tld with address host.domain.tld
    if failed ping4 then alert
    if failed ping6 then alert
    # ISPConfig
    if failed
        port 8080
        protocol https
        and certificate valid > 3 days
    then alert
    # generic domain
    if failed url https://host.domain.tld/
        with timeout 15 seconds
        and certificate valid > 3 days
    then alert
    # Roundcube
    if failed
        port 443
        protocol https
        request /webmail/
        with timeout 15 seconds
        and certificate valid > 3 days
        content = "The Roundcube Dev Team"
    then alert
group connectivity
```
